

Foodservice Education Forum

OUR FIRST ONE!

The FSAA recognizes there is a need to provide services to our members where they can gain a better understanding of particular operational aspects of their business and drive an enhanced efficiency to their bottom line!

To this end we are introducing Foodservice Educational Forums where we facilitate activities with experts in a particular field presenting on their area of knowledge and members can decide if they wish to take up the potential opportunity.

Our first such activity will be held during Fine Food Brisbane and is on the topic of saving energy, specifically electricity, and the very attractive potential savings to be made, as well as delivering an environmental "good citizen" position.

Co Zero is a company specialising in this area and will present some eye-opening detail in this subject. Some of the annualised savings are extraordinary!

COzero is Australia's first energy retailer using technology to empower customers to purchase and consume energy smarter. COzero takes a holistic approach by delivering an end-to-end smart energy service, including EnergyLink energy management and advanced engineering services.*

Their technology combines the latest breakthroughs in single-board computing, wireless communications technology and cloud-based data handling to give you a cost-effective and real-time energy management solution enabling customers to save an average of 18% on their electricity bills.

When: Tuesday April 12th 2016 (during Fine Food Brisbane)

Where: Meeting Room A1, Brisbane Convention & Exhibition Centre, Merivale Street
